A TROOPER'S LETTER

The following letter from a trooper in Stratford's Horse will be read with interest:

CANADIAN PACIFIC RAILWAY ENTERPRISE

Perhaps the best known of trans-American railways is the Canadian Pacific, which extends from the Atlantic to the Pacific, and which is wholly owned by the Canadian government. Its agency for Europe is, of course, in London, but as Liverpool is the principal port of entry for Canada, the general office of the railway is second only in importance to that presented by the Canadian Pacific in London. Mr. J. G. Gilbertson, a gentleman permanently identified with all the sides and the other side of the Atlantic. For many years past the general manager of the Liverpool office has been altogether too small for the increased volume of business, so that it has been decided to point on the Canadian Pacific railway via Liverpool. Large additions have been made to the building adjoining the old office in James street was secured, and the new office is now in full operation. The works of fitting up the new offices was entrusted to the well known firm of L. H. Doll, jeweler and optician, father and son, of this city, and the results reflect the great care upon which the entire office is built. The office is in Elizabethan style, with paneled walls covered with steel stamped paper of chaste Renaissance pattern in old oak paneling and glassed with plate glass. The ceiling is in low relief and the walls are decorated with painted electric lights. The counter is of the standard Canadian Pacific railings, the supporting oak being richly carved and delicately turned, while the curved and fluted pilasters and leaded cathedral lights pale amber and gold. The private office is quite an apartment de luxe, in ivories and gold, and here in the recesses of the wall are fine views of the typical mountain glacier and canyon scenery through the windows. The exterior is a modern system of runs. The external appearance of the office is quite in keeping with the massive and solid decorations. The plate glass window is set in a recess in the wall, and is framed in leaded glass. The curtain of old gold which shuts it off from the office is a picture in itself. Samples of Canadian produce and pictures of Dominion scenery, etc. The entrance door is of solid granite gilt, and the floor is of rich mosaic. The basement is used for storage, and there is a separate entrance from the back of the premises. It is provided with wood burning stove, and is supplied with hydraulic lift. Altogether this magnificent office is a credit to the Canadian Pacific railway and its character.
